Balancing Risk and Operational Impact While Complying with DSCSA 2023

What is the best way for hospitals and retail pharmacies to approach DSCSA 2023 compliance? Should you simply receive EPCIS data, or take the additional steps of reconciling the physical item to the electronic [DSCSA compliance](#) information?

Watch our on-demand webinar, “**Balancing Risk and Operational Impact When Complying with DSCSA 2023**,” to learn how your DSCSA 2023 compliance strategy impacts your pharmacy operations and what solutions you can deploy to support that strategy. Topics include:

- A comprehensive look at the benefits and drawbacks of the various pharmacy approaches to DSCSA 2023 compliance, ranging from simply receiving EPCIS transactions to full item-level verification and reconciliation.

- A complete overview of serialized receiving strategies with expert advice on how to effectively manage serialized receiving as part of pharmacy operations.
- A live demonstration of [**TraceLink Smart Inventory Tracker**](#), which enables serialized receiving and integrates seamlessly with backend warehouse management systems.

You'll also see real-world examples of how TraceLink delivers results for hospital and retail pharmacies that have already achieved DSCSA 2023 compliance and implemented serialized receiving.

Learn how to achieve DSCSA 2023 compliance, increase operational efficiency, and improve patient care. Fill out the form on this page to watch the webinar now.
