DSCSA 2023 for Manufacturers: Critical 2022 Partner Requirements - Video

EPCIS data exchange: Best Practices

- Provide Henry Schein your complete list of saleable unit GTINs, company and location GLN and SGLNs. Load all Henry Schein GLN and SGLNs in your master data.
- Ensure your Sales Shipment messages contain a Commissioning event and Vocabulary list for each GTIN
- Work with your TraceLink Network Services Manager, NSM, to establish SFTP or AS2 connectivity. Test the connectivity prior to sending a first test file.
- Work with your Solutions Provider regarding the creation time of your Commissioning and vs Aggregation events. If you are Commissioning a large number of Product Identifiers, be sure the Aggregation events for these products occurs **after** the Commissioning events are complete.
- Be sure to send the correct NDC-11 XML tag and 5-4-2 NDC format in your data.
- Whenever possible test using an item and GTIN that Henry Schein purchases from you in Production.
- Always send the Henry Schein purchase order number, or ASN reference number, (for multi PO shipments), in your Shipping event.
