# U.S. Wholesaler Is Integrating EPCIS and Business Transactions with MINT

A U.S.-based pharmaceutical and medical devices wholesaler chose TraceLink MINT to consolidate serialization and procure-to-pay (P2P) digitalization into a single robust platform—creating real-time synergies between financial and compliance data flows.

## Company Type
- Wholesaler

## Key Sponsor
- Chief Financial Officer

## Company Scope
- National Operations
- 500+ Trading Partners
- $10-$100M Annual Revenue

## Target KPIs for Engagement

**100%**
Automated P2P Operations

**60%+**
Faster Supplier Onboarding

**50%+**
Less Manual Data Entry

## Customer Business Challenges
- Maintaining multiple systems for DSCSA and EDI increases cost and operational burden
- Manually entering purchase orders into the ERP system consumes valuable staff time
- Multiple systems requires manual data entry and introduces errors into the P2P process

## Partners Orchestrated

- CMO / CPO
- 3PL / 4PL
- Carrier / Freight Forwarder
- Distributor / Wholesaler
- Materials Supplier
- MAH / Brand Owner
- Hospital / Pharmacy

## Key MINT Transactions
- Purchase Order
- Purchase Order Acknowledgment
- Invoice
- Advance Ship Notice

## Processes Digitalized
- Procure-to-Pay
- DSCSA Compliance Validation

## The Solution
- Single integration to all suppliers to manage DSCSA and digitalize all P2P data exchange
- Automating the exchange of P2P data reduces human error and improves efficiency
- Unified view of real-time commercial and compliance data accelerates business decisions
